

# MEASURING WASTED FOOD: 3 METHODS

*Zero Food Waste Forum*  
*October 19, 2018*

*Wendi Shafir*

# Source Reduction - greatest GHG benefits

- calculated using EPA WARM model

# The Three Methods: Sort, Audit, Track

- **Wasted Food Sort**: snapshot of **amount** and **type** of discarded food.
- **Wasted Food Audit**: snapshot of **amount, type** and *reasons* for the wasted food.
- **Wasted Food Tracking**: longer-term (weeks – ongoing) generally back-of-house. **Amount, type** and *reasons*.

# Wasted Food Sort

- Sort edibles, non-edibles + recyclables
  - Manually sort a sample of garbage waste
  - Visual observation and estimation
- Duration
  - One meal service or day
- Aka waste characterization study
- May be pre, post-consumer or both

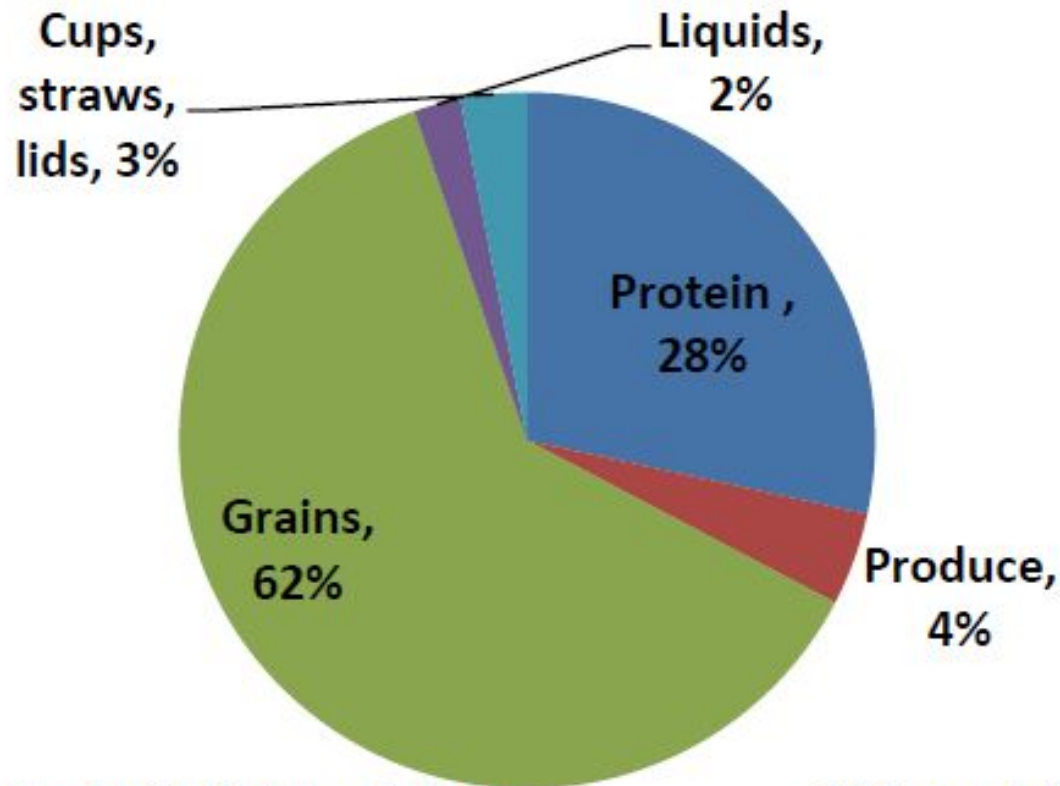

# Wasted Food Sort Logistics

# Wasted Food Sort Data Analysis

Protein - beef patty, hot dog, ck fingers

58.6 pounds food

Grains - pasta, rice, fries

*Back of the house characterization – Game Day*

# Sort Pros and Cons

- Gives snapshot in time
- Can extrapolate from the data
- Limited duration
- Uses mostly inexpensive equipment
- Low level expertise required
- Requires coordination, staff time
- Does not provide reason for waste

## A Guide to Conducting and Analyzing a Food Waste Assessment

March 2014

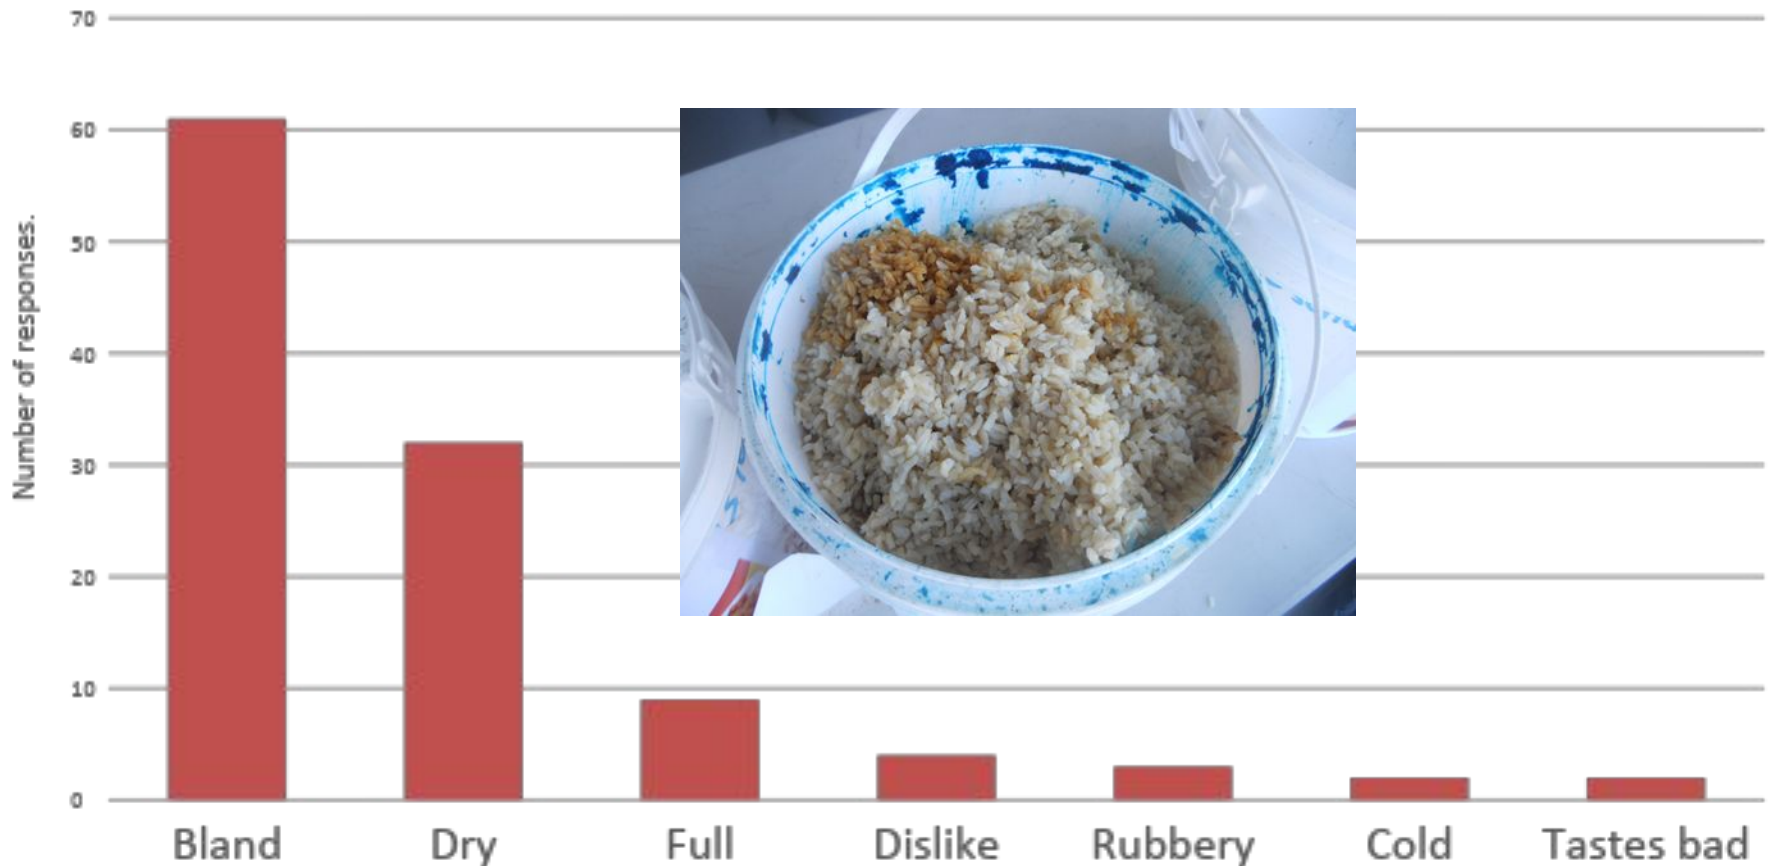

# Wasted Food Audit Overview

- Measure plate waste
- AND back-of-house excess/waste
- Includes *reason* for waste
  - *Interview* diners, kitchen staff
- Can calculate cost of wasted food
- Identify targeted solutions

# Wasted Food Audit Data Analysis

## Reasons for Leftover Brown Rice (103 lbs.)

# Audit Pros and Cons

- Gives snapshot in time, can extrapolate
- Limited duration, but takes longer than a Sort
- Uses mostly inexpensive equipment
- Mid level expertise required for interviews
- Requires permission from venue
- Need cooperation from diners, +/-staff for interviews
- Requires coordination, staff time
- Provides reason for waste

# Wasted Food Audit Measurement Guides

## Guide to Conducting Student Food Waste Audits

*A Resource for Schools*

# Wasted Food Tracking Overview

- Multi-day tracking systems assess:
  - Amount and type of wasted food
  - Reasons
  - Patterns
- \*Usu. Back of house
- Manual or automated

# Wasted Food Tracking Data Recording

- Types of waste tracked:
  - Kitchen (Back-of-the-House) Primary
  - Plate (Front-of-the-House)
  - Packaging
- Can measure:
  - Amounts and types of wasted food & packaging
  - Causes of waste generation
  - Patterns of waste generated

# Wasted Food Tracking Data Analysis

Table I: Tracking Example: Results from the Food and Packaging Waste Prevention Tool  
(weekly pounds of wasted food)

Kitchen Food Waste	Prep Waste	Improperly Cooked	Stored Food Expired	Arrived Spoiled	Food Sent Back by Customer
Protein	0	5	33	0	0
Grain	6	1	0	0	0
Fruit and Vegetables	8	0	5	16	0
Dairy	3	0	0	0	0
Other	0	0	0	0	0
TOTAL	17	6	38	16	0

# Manual Wasted Food Tracking Guide

2 resources in 1 toolkit: a [PDF guide](#) and a programmed [Excel spreadsheet](#)

PDF guide:

[http://www.epa.gov/foodrecovery/docs/reducing\\_wasted\\_food\\_pkg\\_tool.pdf](http://www.epa.gov/foodrecovery/docs/reducing_wasted_food_pkg_tool.pdf)

Excel tracking spreadsheet:

[http://www.epa.gov/waste/consERVE/foodwaste/docs/foodwaste\\_audit\\_tool.xlsm](http://www.epa.gov/waste/consERVE/foodwaste/docs/foodwaste_audit_tool.xlsm)

# Automated Wasted Food Tracking

Subscription-based automatic tracking services: examples

- LeanPath
- Trim Trax
- Winnow
  
- Still require staff buy-in, cooperation

# Tracking Pros and Cons

- Gives data over time, improved accuracy
- Minimal disruption in service
- Uses more expensive equipment
- May involved ongoing costs for subscription
- Mid level expertise required
- Requires coordination, staff time
- Provides reason for waste, trends analysis

# How to decide on approach

- What do you want to know?
- What can you act on?
- Do you have time and resources? Support?
- Do you have access to the wasted food?
- Food Loss and Waste Protocol has decision tool
  - [FLW Quantification Method Ranking Tool](#)
- [Guidance on FLW Quantification Methods](#) has more info on different options
