

GOT CARTONS?

JOIN US TO HEAR THE LATEST NEWS ABOUT GABLE TOP AND ASEPTIC CARTON RECYCLING PROGRAMS IN CALIFORNIA.

THIS ROUND TABLE DISCUSSION FEATURES RECYCLERS AND MANUFACTURERS TALKING ABOUT RECYCLING THESE MATERIALS IN 2023.

Gable top and aseptic cartons are recyclable, but don't represent a huge portion of what is thrown away at the municipal level (less than 1% statewide in California). However, this product-type is growing with the addition of new types of non-dairy milk products, wine boxes, soups, and other shelf-stable packaging.

Come and join this webinar for a dialogue about gable top and aseptic cartons and the evolution of markets, sorting technology and their recyclability. This roundtable discussion will provide insights into what we can do to increase their recyclability throughout Northern California.

**Webinar #13
3/23/2023**

**Special Time!
12:00-1:00 pm**

Guest experts contributing to this discussion include:

- Susan Robinson and Tom Wright, Carton Council
- Tim Dewey-Mattia, Napa Recycling
- Representatives from local recyclables processors
